Rudy W. Giuliani, Who Will Be Our President? The
Current State of Our Country | Rudy Giuliani |
Ep. 97, YouTube (Dec. 25, 2020)

Plaintiffs' Exhibit

PTX-5

C.A. No. 21-3354 (BAH)

1 RUDY GIULIANI: Hello again. This is
2 Rudy Giuliani. Merry Christmas. And I'm here
3 with another episode of Rudy's Common Sense, and
4 it's going to be published on Christmas Day, so
5 hopefully you're listening to it on Christmas Day
6 and you and your family and all your loved ones
7 have had a joyous and a beautiful Christmas, and
8 you've received the grace of our Lord, Jesus
9 Christ on the day of his becoming man.

10 Which is one of the truly miraculous
11 and earth-shattering things that have happened in
12 human history, that made humanity what it is,
13 made western civilization what it is, and made
14 people what they are. And gave us the importance
15 of human life. All human life. How valuable it
16 is, how important it is, how it has to be
17 cherished, and how it has to be protected and
18 preserved, as well as the liberties and the
19 rights that go along with being human, which are
20 given to us by God and not by man.

21 And that's really been the pursuit of
22 this entire podcast, Common Sense, to try to
23 explore the issues that are so controversial from
24 the point of view of, you know, what makes sense?
25 What really is involved in these values and in

1 these rights, and how can they so easily be
2 trampled over, and as we look back on this year
3 of 2020, which we'll do in greater detail maybe
4 next week, but as we look back on this year of
5 2020, it's been a very bad year for human rights,
6 or God given rights.

7 They've been eroded dramatically in the
8 country that didn't create them, but probably
9 enshrined them better than any country in the
10 history of the world, the United States of
11 America. There's never been a year in American
12 history where there has been such an all-out
13 assault on freedom of speech, freedom of
14 religion, free and fair elections, the ability to
15 congregate for causes that you believe in.

16 And your ability to conduct your life
17 with some degree of judgement by yourself without
18 the government dictating to you every little
19 detail of it. These are enormous intrusions into
20 a country of civil liberties and civil rights,
21 human rights, and God given rights. And
22 something we're going to have to review for the
23 future to make sure it doesn't happen again. But
24 here we are, Christmas Day, pointing toward the
25 end of the year, going into a probably more

1 dramatic January then we've had in our history,
2 or at least we've had in our history since the
3 last time a Presidential election was in this
4 kind of dispute and gave promise of possibly even
5 going to the House of Representatives.

6 From the point of view now of, you
7 know, a lawyer involved in the case, deeply
8 involved with my client, let me tell you what
9 four, five states are to look at. And I'm going
10 to give you the key things to look at in those
11 states. Over the course of the next week or two,
12 of course we'll go into more detail on it, and
13 then show you more of this, but maybe it'd be a
14 good idea to sort of see what's at issue in these
15 states, and why there's so much turmoil, because
16 many of you maybe have not gotten beyond the
17 dominated, basically Democrat party control press
18 that we have in this country, which is akin to
19 the kind of press they have in Venezuela, China,
20 and in countries that are dictatorships.

21 For purposes of press right now, we
22 might as well be in a dictatorship with a few
23 exceptions, like my ability to communicate with
24 you on podcasts or on WABC or on OANN or on
25 Newsmax. Or on some of the really brave

1 independent radio stations that carry people like
2 Sean Hannity, Rush Limbaugh, again WABC, my radio
3 station. It if wasn't for them, we'd have a
4 complete blackout of free speech. If you were to
5 count on the television networks, free speech has
6 been gone for quite some time.

7 Free speech actually eliminated
8 completely since the Biden hard drive. So, let's
9 see if by thinking about the significance of what
10 unites us as human beings, which is God, our
11 affinity with Jesus, our -- let's see if we can
12 agree on a few facts that might then show you
13 that what we're doing here is to try and
14 determine who honestly was elected President of
15 the United States.

16 So, let's start with the State of
17 Pennsylvania, where we had, I would say, in terms
18 of scope, the largest fraud. What exists to show
19 that the vote in the State of Pennsylvania, as
20 submitted to President of the Senate is a false,
21 perjurious, lying statement? Well, the first
22 thing that can do that is that there are
23 affidavits from hundreds of witnesses proving
24 that 822,777 ballots were entered without any
25 observation by an independent observer.

1 Against the law of Pennsylvania and
2 against common sense. And they were all done in
3 the middle of the night when Biden was behind
4 Trump by 600,000 votes and he had to desperately
5 catch up. Because if he didn't catch up by the
6 morning, surely Pennsylvania would be called for
7 Trump, and that would push him pretty close to
8 having an electoral majority, and they were going
9 to stop that (indiscernible).

10 882,770 votes, as recorded, all in
11 affidavits, under oath, some of it presented in
12 testimony before legislatures, none of it
13 presented to a Court because no Court will hear
14 evidence on this. No Court. Another terrible
15 failure in our system over some of the courage
16 that's come out of it. So, that's one. Also,
17 another statistical fact that just makes it
18 crystal clear that Pennsylvania numbers are
19 dramatically false, and that is that there were
20 more mail-in ballots counted than there were
21 mail-in ballots sent out.

22 I want you to consider that, right?
23 The way it works is, you're supposed to get a
24 mail-in ballot, absentee ballot, and you then
25 fill out the application on the front, you put

1 your name, your address, your precinct, you sign
2 it, there's a inner envelope, they call it the
3 security envelope. And then there's the ballot.
4 You take out the ballot and you fill it out.
5 When you fill it out, you fold it so it fits into
6 the secure envelope, you seal it, and you put it
7 in the bigger envelope and you seal that.

8 And you send it in. All those ballots
9 were sent out by the State. People can't just
10 create those ballots on their own. Obviously.
11 All those ballots are numbered and when they are
12 received back, they say oh, we sent out 1.8
13 million. Hmm, we've gotten back 1.4 million.
14 400,000 didn't come back. People decided not to
15 vote by absentee ballot. They may very well have
16 voted on election day. That really isn't a
17 concern.

18 However, when you look at the vote, you
19 see that well over two million mail-in ballots
20 were counted. Now, if only 1.8 million were sent
21 out, and only 1.4 million were recorded as coming
22 back, where did this other group that could be as
23 great as 700,000 or 800,000, where'd these
24 ballots come from? Who printed them? They're
25 not on the list printed by the State or ordered

1 by the State.

2 Where do they come from? You gotta be
3 stupid. You know where they came from. They
4 were made up. They were made up because
5 Pennsylvania was out of hand. They never
6 expected him to be ahead at one point by 800,000
7 votes in Pennsylvania. They had enough ballots
8 that had been made out in advance to cover that,
9 a couple of hundred thousand here and there.
10 They didn't have the 700,000, 800,000 ballots
11 they needed.

12 So, they had to go make them up. Now,
13 State of Pennsylvania will not let us examine
14 their ballots. Why? The ballot doesn't show you
15 who someone voted for, it's just, now it's just
16 an empty ballot with Biden's name on it or
17 Trump's name on it. Because you know, we could
18 put it in a machine and we could tell you whether
19 it's a legitimate ballot or not.

20 We could tell you by the markings, we
21 could tell you by the stationary, we could tell
22 you by sometimes the pen that's used too
23 repetitiously. We could tell you by the folding
24 of the paper. We could tell you that,
25 definitively, maybe not all 600,000 or 700,000

1 but 500,000 of those votes are phony votes. You
2 take that away from the 80,000 margin that Biden
3 has and Trump wins Pennsylvania.

4 Independent of the unexamined ballots.
5 I think this would be a good time to take a short
6 break. (commercial) Thank you very much for
7 coming back, and let's review the rest of the
8 States. And now let me show you a chart. Let me
9 show you a chart that could be one of the most
10 extraordinary things that has ever happened in
11 American politics from the point of view of
12 cheating.

13 And you'll turn this chart around and
14 this should be up on your screen. This is the
15 day of the election, and this is the day after,
16 the day after, the day after, and the day after.
17 So, this is when the counting process begins.
18 So, when we start, we start with the election day
19 numbers. On election day, Biden had
20 approximately 2.5 million votes. On election day
21 before we started reading the mail-in ballots,
22 Trump had 3.1 million votes. That was a very,
23 very large 600,000 lead.

24 Way beyond what anybody anticipated
25 Trump having. This is a wipeout, 13 percent.

1 Only 65 percent left to vote. Well, how do you
2 make that up? Well, you do it like they did in
3 Georgia and Michigan and in Wisconsin and in
4 Arizona. You close the counting machine -- the
5 counting room down. You say, everybody's going
6 home now, goodbye, we're not going to count
7 anymore, and then when the few people that are
8 independent are gone who couldn't (indiscernible)
9 anyway, you start to bring ballots in, and look
10 what happens between the election day and then
11 just the next day before noon.

12 The lead of Trump is shrunk to 160,000
13 votes. The 600,000 gets shrunk to 160,000.
14 These are the Biden votes coming in. You could
15 say effectively there was not a single Trump
16 vote. But if you want to know the exact number,
17 it's almost equally as stupid, it's the
18 following. Biden received a 578,014 votes, Trump
19 received 3,290 votes. That's too -- 0.2 percent.
20 There's no place in the country that Biden --
21 that Trump received any number like that.

22 If we look at Pennsylvania, his worst
23 number is 20 times higher than that. 20 times
24 higher than that. What I'm telling you is you
25 couldn't have found a sample of votes that were

1 that skewed. Couldn't have find it in
2 Pennsylvania, couldn't have found it in New York
3 or California. You couldn't have found it
4 anywhere. Because it's made up. It's phony.
5 Oh, but the Democrats in Philadelphia wouldn't
6 cheat. No. They've only just done it in the
7 last 60 years in every election.

8 They only just leave the country and
9 the number of people convicted of voter fraud.
10 You know, the reality of all this? The real
11 shocking thing in this election that meant so
12 much is that Philadelphia didn't cheat. Then
13 something strange would have happened. This
14 isn't strange, this is how bad and how crooked
15 the Democrat party has become, and how greedy
16 it's become for power and money, and how much of
17 control it has on our media that you never saw
18 that chart before.

19 You should have seen that chart three
20 days after the election on NBC and CBS and ABC.
21 If they had an interest in tell you the truth.
22 You tell me that that chart doesn't prove that
23 they stole Pennsylvania. Trump won Pennsylvania
24 by 300,000 votes. I don't want to burden you
25 with more, maybe later on, but I'll show you

1 exactly how that can be proven.

2 But in any event, the one thing for
3 sure is the vote that submitted by Pennsylvania
4 is a fraud, it's a perjury, it's dishonest.
5 Governor Wolf and all his crooked Democrats are
6 participating in it, and letting it stand. Now
7 we go to Arizona. Arizona, how do we know that
8 Arizona is wrong? Oh, I'm going to give you an
9 easy one, okay? I'm going to give you an easy
10 one that does rely on common sense.

11 Mr. Paine's Common Sense. The guide
12 for our show. You know Arizona, you know how
13 close it is to the border. It's on the border.
14 You know the hundred years of border crossing
15 issues that it's had, and the 50 years of illegal
16 immigration non-citizens, you can have different
17 views on it, benign, very strong, somewhere in
18 between, somewhere balanced. But you know that
19 Arizona is filled with non-citizens.

20 Some of them come seasonally and some
21 stay for a lifetime. And many of them vote, and
22 they voted forever. That nobody checks. So, the
23 Governor of Arizona, who unfortunately calls
24 himself a Republican and his little entourage in
25 there have submitted an entirely laughable vote

1 count in that it pretends that it doesn't contain
2 the vote of a single non-immigrant.

3 So, Biden beats Trump by 10,000 votes,
4 but has no votes from non-citizens. Not a single
5 non-citizen voted in Arizona this time, for the
6 first time in 50 years. If one did, then that
7 statement before Congress is perjurious, false.
8 Well, of course it's untrue. And they know it's
9 untrue, and they think you're too stupid to care.
10 And they think that the big tech, big networks,
11 big corporations, and the big money like the
12 money that comes from Dominion, they think it's
13 going to make you all be somnolent and go to
14 sleep and not pay attention that singular,
15 common-sense fact that proves that Arizona has a
16 false submission to the United States government.

17 I think these false submissions should
18 be prosecuted. So, we've done some surveys.
19 Barest minimum that we get back in the survey,
20 done by a fairly pro-immigrant group is 36,000
21 non-immigrants -- or non-citizens voted. Largest
22 is 237,000. You pick a number in between. It
23 flips the state from Biden to the guy who
24 actually won it, Trump. This is how they stole
25 the election, ladies and gentlemen.

1 We're not making it up, these are cold,
2 hard, facts and just pure common sense. Now, if
3 you don't want to do it that way, you can do it
4 with the out of state voters that were allowed to
5 vote. Clearly voting out of state as well,
6 they're more than enough to turn the tide of the
7 election. Or you can base it on the uninspected
8 ballots in Pima County, in Coconino County, and
9 of course, in Maricopa County, which get up into
10 the hundreds of thousands.

11 So, there are three independent ways of
12 demonstrating the number's wrong, therefore the -
13 - must be decertified, and the number breaks out
14 with a Trump win somewhere around 40,000 or
15 50,000. Wow. Two states, stolen. Why don't we
16 take a brief pause and we'll be right back.
17 (commercial) Thank you for coming back, and let's
18 finish the review of these states.

19 Now we go to Michigan. Michigan
20 probably has the most dramatic situation of all,
21 and that is the 4:30 in the morning dump of
22 100,000 ballots, after everyone had been thrown
23 out of the center for some time, and three people
24 remained behind. Two Republicans surreptitiously
25 remained behind and a Dominion employee who was

1 disgusted with the dishonest conduct of Dominion.

2 They stood behind, and all of a sudden,
3 these trucks pulled up. They thought it was
4 food. It wasn't food, it was a bunch of ballots.
5 Lots of ballots. In garbage cans. In waste
6 paper baskets. In this and that put up on the
7 stand, they started reading them off. Turns out
8 to be all Biden, all the time. 100,000 votes.
9 You can see it in the bump for Biden, you can see
10 it in the total switch around of votes. That's
11 100,000 ballots. 100,000.

12 Or you can take a look at Wayne County
13 itself, where 71 of the precincts couldn't
14 balance their books. What does that mean? It
15 means that like in Pennsylvania where the number
16 could be as high as 700,000, more people voted --
17 there were more votes than people who voted.
18 When you go look at the particular precinct,
19 let's use a number.

20 You know, it shows 4,000 people voted
21 that day. Oh, but no, it recorded 6,000 votes.
22 Gee, who are these other 2,000? This is so bad
23 that the County Board refused to certify because
24 of the 71 that couldn't be balanced. That's a
25 lot. And then they were threatened. They were

1 doxed, their phone numbers were put out, their
2 addresses were put out, they were threatened with
3 death, and they changed their vote on a theory
4 that there would be a forensic audit.

5 The vote went in, the forensic audit
6 was called back, and they have since withdrawn
7 their votes. They refused to certify this. The
8 Governor ignored it, and Governor Witless and her
9 Secretary of State, who was already committed a
10 felony in saying that records should be
11 destroyed, submitted a dishonest, criminal,
12 fraudulent vote that includes the 100,000 dump.
13 It includes the 270,000 votes that were
14 unobserved, and it includes these questionable --
15 not questionable, these non-existent votes that
16 have to have been phony votes where you have
17 4,000 people voting, but 6,000 votes.

18 This is the reason we want to see those
19 machines. And then when we did see the machines
20 in Michigan, over the great objection of the
21 dishonest officials of Michigan, because they
22 don't want you to look at these machines in the
23 worst way, 'cause it's going to prove what crooks
24 they are, we found that 82 percent of the ballots
25 that went into that machine didn't get registered

1 immediately.

2 They went off for adjudication, because
3 they were found to be not distinct enough, and
4 then some third-party administrator without a
5 Republican around decided who you voted for. And
6 you don't even know that. You don't know if your
7 vote was counted. You don't know if your vote
8 was put into adjudication, and you don't know if
9 your vote was changed in adjudication. That
10 happened often enough to change the result of the
11 election, and we could find that out for sure if
12 they would stop obstructing our ability to
13 examine all the machines in Michigan.

14 Don't you think that all the machines
15 in Michigan should be audited before we declare a
16 winner in this election? They don't want you to
17 see any of the machines in Michigan. Again,
18 let's use common sense. Why? If those machines
19 are clean as a whistle, I'd offer them four weeks
20 ago. Come on, look at the machines. No, no,
21 4,000 people voted, and 4,000 votes were counted.
22 Not the way you say.

23 Instead, we've run the machines we
24 have, and they never balance. One case we did it
25 three times. We got three different results.

1 Same thing in Georgia. These machines are quite
2 something, these Dominion machines. Big question
3 to be asked, and we'll ask it right now as we
4 move onto Georgia is, why did the Governors buy
5 these machines? First of all, they're foreign
6 machines. Why would we use foreign machines in
7 our election? Why would we use foreign machines
8 that are porous as Swiss cheese?

9 You can invade them, you can hack them,
10 you can hook up internet links to them. You can
11 change votes, you can recalculate votes. You can
12 do things that you'd only want to do if you're
13 cheating. Why did they buy these machines?

14 Georgia, with a Republican Governor named Kemp, I
15 say the word Republican advisedly, hey, our party
16 isn't made up of all great people, either. Kemp
17 bought these machines, he spent 110 million
18 dollars on these new machines that, right from
19 the beginning, his electors told him were crap.

20 But he bought them for 100 million, he
21 and his Secretary of State, Raffensperger, who
22 looks like he's working for the other side.
23 Well, that was a big number, big, big number, and
24 they got crappy machines for it. So, what about
25 Georgia? How do we show you that Georgia, the

1 numbers in Georgia are another big fraud
2 submitted by Kemp, Raffensperger, and their
3 Lieutenant Governor puppy dog who, you know, says
4 nothing went wrong in the election?

5 Well, this is truly see no evil, they
6 must think the people in Georgia are stupid.
7 Everybody in Georgia can look at a video, live
8 from Fulton County. Let's watch the Democrats
9 steal the election. And there you see it. Ruby
10 Freeman and her crew getting everybody out of the
11 center. Creating a false story that there was a
12 water main break. No water main break. They get
13 everybody out. They wait, they wait, they wait.

14 They check, they check, they check,
15 like they're going to do a heist. And all of a
16 sudden, the crooks sprang into action. They go
17 under a desk covered like a casket and they start
18 pulling ballots out. Tremendous numbers of
19 ballots. And they bring them over to one County
20 stand way over here. Another County stand.
21 Another -- and they keep looking around to make
22 sure there's nobody in the room. And then they
23 start counting. Every once in a while you look
24 closely, you can see them doing this, with one
25 ballot.

1 You know what that does? That takes
2 Biden and multiplies it by five. Bum, bum, bum,
3 bum, bum, bum, bum, bum, bum. We got independent
4 video of that in Coffee County, how you can do
5 that. Bum, bum, bum, bum, bum, bum, bum, bum,
6 bum. So then we take a look with our experts.
7 How -- what could they have gotten away with
8 there? 120,000 votes? 130,000 votes? To
9 something like about 2,000 for Trump? And Biden
10 won by 10,000 votes.

11 Dishonest number, Governor Kemp.
12 Submitting a false statement to the United States
13 Government is a violation of 18 United States
14 code section 1001, they apply it to everyone
15 else, not just Republicans who possibly commit
16 crimes in favor of Democrats. And what kind of
17 Republican are you, anyway, Kemp? Letting our
18 party get cheated. All throughout your state,
19 Republican observers were pushed away, not
20 allowed to observe the ballots.

21 In some cases, even physically. What
22 kind of Republican are you? What kind of man are
23 you, letting that happen? What kind of Governor
24 are you? Buying a machine like Dominion?
25 Letting our votes be counted by a foreign machine

1 just because they offer the state 110 million
2 dollars? Governor, exactly who are you? And
3 what are you about?

4 This election was stolen. You know it.
5 You know it. Everyone in Georgia knows it.
6 Democrats at least stick together. That's true,
7 they stick together committing crimes. We can't
8 even stick together doing the right thing.
9 That's a shame. You've really let down Georgia.
10 You've embarrassed your state. You've put a
11 cloud of dishonor on the State of Georgia. And
12 the rest of Georgia should remove that.

13 I don't have to go into the out of
14 state voters. More than enough illegitimate out
15 of state voters to change the result. The
16 underage voters. The dead voters. The no
17 verification of absentee ballots, that amounts to
18 about 300,000 votes in Governor Kemp's crooked
19 version of Georgia. And finally, Wisconsin.
20 Wisconsin is a very interesting situation of its
21 own. All the same kind of voter fraud in
22 Wisconsin as in the other places.

23 Republican being kept out to the tune
24 of a couple hundred thousand votes. Out of
25 state, all that. Even some dead people.

1 Probably less than most states, but some dead
2 people. But Arizona has a different absentee law
3 than anyone else. Arizona didn't buy into this
4 mail-in ballot thing, because it realized the
5 mail-in ballots -- it realized what was going to
6 happen, it was going to be a tremendous amount of
7 fraud.

8 We have been warned of that for 50
9 years. That if we ever did it, the election
10 would be overcome by fraud. Well, Jimmy Carter
11 and James Baker turned out to be right, as did
12 Justice Souter and many other scholars who warned
13 us. It turned into a disaster. And an election
14 that has to be reversed. But, Wisconsin wouldn't
15 change, and Wisconsin said, we're sticking with
16 our absentee ballot rule. We don't like absentee
17 ballots, we don't trust absentee ballots, you
18 think you should have enough interest to get up
19 off your backside and go vote on election day.

20 But if you want to do an absentee
21 ballot, you're going to have to do it by the
22 strict rules, and if you don't apply the strict
23 rules, you don't get the presumption that we're
24 going to go to extra lengths to honor the right
25 to vote. We're going to throw your vote out.

1 Because we have no way of verifying you. And you
2 have too easy a job of taking advantage of us if
3 we become too lenient.

4 Okay, so that's just back -- that's the
5 setting. So, Arizona says that if you cast an
6 absentee ballot, a couple of things. It cannot
7 be solicited. Someone can't come and ask you to
8 do it. Someone can't bring you the stuff to do
9 it. You have to witness -- you have to show that
10 you want to vote that way, so therefore you have
11 to go out of your way to get the application.
12 You then have to fill the application out, make
13 out the rest of the other parts of the ballot.

14 You've got to fold it up, put it
15 together, and you have to personally mail it in
16 yourself. No one else can take it for you,
17 either to the mailbox -- well, unless you're at
18 the mailbox, but nobody can take it to the
19 Clerk's office. You have to do that. And then
20 they had to enforce that rule, they say, when
21 they count the absentee ballot, any absentee
22 ballot without an application is discarded as a
23 vote.

24 No -- you don't have to worry about the
25 remedy, that's their remedy. It's discarded as a

1 vote. And a group that's allowed to do an
2 absentee ballot, only exception are those people
3 that are indefinitely confined. So, indefinitely
4 confined means basically being in a nursing home
5 or being on life support at home. Traditionally
6 20,000 people in Wisconsin, otherwise you had a
7 vote like everybody else.

8 All of a sudden without any legislative
9 authorization, without any change in the law,
10 completely illegally, the Secretary of State
11 announces, this is COVID, everybody's
12 indefinitely confined. They go to the Supreme
13 Court of Wisconsin, and the Supreme Court of
14 Wisconsin says, absolutely not. You can't change
15 the law, it's the same law, it's got to be
16 applied the same way.

17 Well, they basically say, the Democrats
18 do, to hell with the Courts. And here's what we
19 have happen. We have votes being solicited at
20 fairs, we have votes being solicited at parties,
21 we have votes that come in that have no
22 applications, we have votes that come in that are
23 filled out improperly, and that amounts to about
24 226,000 votes that should be discounted in --
25 just in Dane County and in Milwaukee County

1 alone. That would be Milwaukee and Madison,
2 Wisconsin.

3 Particularly people who claim to be
4 indefinitely confined and for which we've now
5 gone through the trouble of finding evidence that
6 they were fully mobile, fully involved, working,
7 playing, doing sports. In other words, true
8 frauds. And that number, although not final yet
9 'cause we haven't finished our investigation,
10 that number will exceed the margin of error -- or
11 not the margin of error, the margin between Trump
12 and Biden.

13 So, I know what you've been told about
14 our fanciful, weird, strange theories of fraud,
15 cleanest election ever. Let me just review
16 quickly to tell you about the f -- the best ever.
17 Pennsylvania, you remember the chart, the 600,000
18 votes that came in in the middle of the night.
19 You also remember I hope, that there are 870 --
20 882,770 votes that were uninspected. And you
21 also remember that there are some 400,000 to
22 700,000 more mail-in votes counted than ever
23 printed.

24 So, count out Pennsylvania.
25 Pennsylvania, certification wrong. That should

1 be decertified. And it should be certified by
2 the State Legislature as they have the power to
3 do in favor of Donald Trump. Arizona. Arizona
4 has more non-citizens voting then the margin of
5 error between the two. The breakdown either by
6 County or anywhere else is about 80/20.
7 Biden/Trump. That tell -- takes you way beyond
8 the margin necessary to reverse the state from
9 Biden to Trump.

10 Michigan, when you count the
11 (indiscernible) 82 percent adjudication rate,
12 which means that the person doesn't get to make
13 their own votes, an administrator does, probably
14 a Democrat, and number two, that 70 -- 71 of the
15 precincts in Wayne County, the largest County,
16 the vote didn't balance. In other words, there
17 were more votes counted than people who voted.

18 And when you consider that 300,000 to
19 400,000 votes were put into the mail-in vote
20 machines without any observation by Republicans,
21 although there were several observations from far
22 away that these votes were entered four, five,
23 and six times. When you consider the dump of
24 100,000 votes in the middle of the night all for
25 Biden, my goodness, my goodness, my goodness.

1 The number that Trump won Michigan by looks
2 pretty much like the number we all went to bed on
3 on election night.

4 About 120,000. Just like Pennsylvania
5 looks like something like 300,000 to 400,000.
6 When you take out the illegal ballots, and when
7 we get to Georgia, just look at the tape. That
8 accounts for anywhere from 40,000 to 80,000
9 votes. The number then, when we look at it on --
10 was like 138,000 for Biden, and 2,000 for Trump.
11 Take those out of their numbers, Trump won
12 Georgia. Honestly. We won honest votes, here.

13 And finally, Wisconsin. The
14 indefinitely confined were not indefinitely
15 confined. That's a fraudulent vote. Wisconsin's
16 tough on these things. Wisconsin has to change
17 its certification. Has to certify. That's
18 what's going to go on now. Going to State
19 Legislature then go on in Congress. It's going
20 to be pursued, and no matter what the crooked
21 media tells you, it's a real case.

22 So, I hope this gives you an overview
23 to get you prepared for next week. Hope you have
24 a very nice Christmas weekend, this is a
25 beautiful time to spend time with the family and

1 to reflect on the true meaning of Christmas,
2 which we know the true meaning of Christmas, it's
3 not gifts, it's not Santa Claus, it's not
4 whatever else is nice about it. Those things are
5 all nice, and those things are all wonderful and
6 gosh, I'm still enough of a child to still want
7 my trains back.

8 Christmas is about the greatest miracle
9 that occurred in human history. And the one that
10 makes us what we are. Human beings. Makes us
11 very special. 'Cause we're made in the image and
12 likeness of God, and God demonstrated that by
13 having his only son become man. That's a lot to
14 reflect on there. And hopefully that reflection
15 will help to change your behavior. I hope it
16 changed mine as well. Well, Merry Christmas,
17 we'll be back a few days. Thank you very much.
